DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-8, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Marotta.

There is disclosed in Marotta a beverage making apparatus, comprising: a heated water tank 41; a heating element 28 operatively associated with the heated water tank for heating water therein; the heated water tank defining an inlet aperture 60 therein for receiving water to be disposed in the heated water tank; an insulating tube 30, 65, formed of an insulating material, communicating with the inlet aperture for receiving water therethrough; a fitting 26, 90, formed of an insulating material, for attachment to the heated water tank and the insulating tube; and a gasket 94 for use with the fitting for sealing the fitting.

Allowable Subject Matter

Claims 5 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Kemp, Grossenbacher and Marchant et al. are cited for their disclosure of an insulated tube for use with a beverage making device. The patent to Lucas et al. is cited for its disclosure of the state of the art.
